We are an organisation that exists purely to help our customers accelerate their growth strategies through solution innovation and partnership

General Ledger

Completed integration from POS to Profit and Loss reporting provides enormous savings in administration and results in high levels of efficiency. Flexible financial reporting allows comparisons with budgets, forecasts or last year, and provides drill-down to source transactions for full audit control.

Bank Reconciliation

This normally time-intensive task is streamlined by System 77 due to the full integration with POS banking, creditor payments and recurring entry ledgers. The full suite of management reports covers cash requirements forecasting and much more.

Accounts Payable

System 77 eliminates doubling handling of creditor invoices for stock purchases through direct integration with the Purchasing system. For importers, System 77 manages all foreign exchange variances and allows any number of expenses (freight, cartage, insurance, etc.) in any currency to be included in the landed cost of goods. Suppliers can be paid by EFT and the system provides the ability to electronically distribute remittance advices and credit claims by email or fax, thereby reducing costs associated with labour, postage and telephone.

Accounts Receivable

System 77 provides comprehensive options for the control of customer credit and the management of debts to minimise risk and improve cash flow. End of period processing is flexible and does not disrupt your business operations. The electronic distribution of order confirmations, invoices, credits, statements and quotes serves to improve customer service and minimise costs.

Discovery 77

When you need immediate access to up-to-date data on sales, financials, stock, debtors, creditors, and more, the Discovery 77 Management Information System provides it to you in a simple browser interface with graphs and comprehensive drill-down capabilities. Your crucial business KPIs are instantly available to allow monitoring of performance targets in areas such as customer service

Payroll and Human Resources

System 77 provides a leading industry payroll and HR solution with full support for individual superannuation funds, award interpretation and leave management. Auto pays and pre-defined timesheets simplify the payroll process, and the electronic integration for EFT, ATO, and legislative updates ensures accuracy.

System 77 develops, installs and supports fully integrated software solutions.

We understand that your business software is an important tool you use to manage stock, control expenses, and identify areas where profits and revenues can be increased.

Since 1977 we have provided software solutions to enable businesses to grow whilst improving efficiency to keep costs and overheads low.
